## Profile Summary

---

"AWS-certified cloud and DevOps engineer with 4 years of experience in AWS infrastructure administration, automation, and DevOps practices. Skilled in Terraform, Kubernetes, CI/CD, and serverless architectures, with proven expertise in designing scalable cloud solutions, cost optimization, and operational readiness. Experienced in Agile delivery with cross-functional global teams, ensuring on-time, high-quality deployments."

## Skills

- 
- **Cloud & Automation:** Designed and automated AWS infrastructure using Terraform, CloudFormation, and AWS CDK; implemented serverless solutions with Lambda and automated operations via Shell/Bash and Python scripting.
  - **Containers & Orchestration:** Administered Kubernetes (EKS/ECS) workloads and managed deployments using Helm charts for scalable, repeatable releases.
  - **CI/CD & Version Control:** Built and maintained Jenkins pipelines integrated with Git/GitHub, CodePipeline, and CodeDeploy for automated builds, testing, and deployments.
  - **Monitoring & Operations:** Enhanced reliability with CloudWatch alarms, and proactive tuning; performed operational readiness (patching, upgrades, security hardening) ensuring compliance and system stability.
  - **Collaboration & Delivery:** Worked in Agile/Waterfall environments, driving requirement analysis, effort estimation, risk assessment, and multi-project delivery with cross-functional teams.

## Technologies/Tools

- 
- **Cloud & IaC:** AWS (EC2, S3, RDS, DynamoDB, API Gateway, Lambda, CloudFront, CloudWatch, IAM, SNS, SQS, Lex), Terraform, AWS CDK, CloudFormation
  - **Containers & CI/CD:** Kubernetes (EKS), Docker, Helm, Jenkins, AWS CodePipeline/CodeDeploy, Git/GitHub
  - **Ops & Security:** Shell/Bash scripting, monitoring (CloudWatch, Datadog), IAM governance, KMS encryption, firewalls, patch management.

## Work Experience -

**Full Stack Engineering Senior Analyst, Accenture Solutions**

**(April 2023- Present)**

### Project - CIP (Cognitive Insurance Platform)

- Designed, deployed, and maintained AWS infrastructure for a regulated insurance domain, ensuring **scalability** and **cost efficiency**.
- **Collaborated** with cross-functional teams for requirement analysis, solution design, and feature delivery.
- **Optimized** AWS Lambda for clients (The Hartford, Sun Life), improving performance and user experience.
- **Reduced** AWS costs and resolved production issues, ensuring high availability and **stability**.
- Implemented **Disaster Recovery (DR) strategies** with automated backups, multi-region failover, and recovery testing.
- Performed **operational readiness activities** (patching, updates, monitoring) and applied AWS **security best practices**.

**Full Stack Engineering Analyst, Accenture Solutions**

**(Aug 2021- April 2023)**

### Project - Interactive Virtual Environment

- Built 3D interactive platforms using AWS Sumerian with **Lambda** and **Lex** for real-time **automation** and engagement.
- Developed **chatbots** and interactive workflows to enhance digital experiences and streamline communication.
- Partnered with stakeholders to refine requirements, conduct testing, and ensure seamless deployment in AWS.

## Certifications

- 
- AWS Solutions Architect Associate
  - DevOps Professional by Accenture
  - AWS Certified DevOps Engineer – In Progress

## Achievements

- 
- Received the ACE Award from Accenture Solutions.
  - Received Tech-Star Award from Accenture Solutions.
